

Speakardo Product Requirements Document (PRD)

Version: 1.0 Status: Founder Draft Product: Speakardo Category: AI Life Assistant Author: Nouman Malik

1. Executive Summary

Speakardo is an AI-powered life assistant designed to help users remember, organize, plan, and eventually automate parts of their daily lives through natural conversation.

Unlike traditional reminder apps that require users to fill forms, configure dates, and manage lists manually, Speakardo allows users to simply communicate their intentions naturally.

Example:

"Remind me to call mom after work."

Speakardo understands the request, extracts relevant information, schedules the reminder, and later delivers it through the user's preferred notification channel.

The long-term vision is to evolve Speakardo from a reminder application into a persistent AI companion that remembers context, predicts needs, and autonomously assists users in managing their personal and professional lives.

2. Product Vision

To become the world's most trusted AI life assistant that helps people remember, organize, and execute everything that matters.

3. Mission Statement

Help people spend less mental energy remembering things and more energy living their lives.

4. Problem Statement

Modern life creates an overwhelming number of tasks, commitments, appointments, responsibilities, and personal goals.

People frequently forget:

- Medicines
- Meetings
- Birthdays
- Bills
- Daily routines
- Follow-ups
- Personal commitments

Current reminder applications have several limitations:

- Require manual form filling
- Require selecting dates and times
- Require navigating multiple screens
- Do not understand natural language
- Do not learn from user behavior
- Do not proactively help users

As a result, users either avoid creating reminders or abandon reminder applications entirely.

5. Product Philosophy

Speakardo should feel like:

- Talking to a helpful human assistant
- Simple enough for anyone
- Smart enough to understand intent
- Reliable enough to trust
- Personal enough to feel familiar

Users should never think:

"I need to use a reminder app."

Instead they should think:

"I'll just tell Speakardo."

6. Target Users

Primary Users

Busy Professionals

Problems:

- Miss meetings
 - Forget tasks
 - Need productivity support
-

Students

Problems:

- Assignment deadlines
 - Exams
 - Study schedules
-

Parents

Problems:

- Family schedules
 - Children's activities
 - Household management
-

Elderly Users

Problems:

- Medication reminders
 - Appointment reminders
 - Daily routine support
-

Secondary Users

Entrepreneurs

Remote Workers

Freelancers

Content Creators

Individuals with ADHD

7. Market Opportunity

The productivity and personal assistant market continues to grow globally.

Relevant categories include:

- Reminder Apps
- Productivity Apps
- Note Taking Apps
- Calendar Apps
- AI Assistants
- Digital Companions

The opportunity lies not in competing with reminders alone but in creating a new category:

AI Life Assistant

8. Competitor Analysis

Apple Reminders

Strengths

- Native
- Reliable

Weaknesses

- Limited AI
- Manual setup

Google Tasks

Strengths

- Ecosystem integration

Weaknesses

- Basic reminder experience
-

Todoist

Strengths

- Powerful task management

Weaknesses

- Complex for casual users
-

Notion

Strengths

- Flexible

Weaknesses

- Requires setup and maintenance
-

ChatGPT

Strengths

- Natural conversation

Weaknesses

- Not purpose-built for life management
-

Siri

Strengths

- Voice interface

Weaknesses

- Limited memory
 - Limited personalization
-

Competitive Advantage

Speakardo combines:

- Natural language
- AI memory
- Reminders
- Voice
- Predictive intelligence

into a single experience.

9. Product Positioning

Speakardo is not:

- A reminder app
- A task manager
- A calendar app

Speakardo is:

An AI-powered life assistant.

10. Core Value Proposition

Simply tell Speakardo what matters.

Speakardo remembers, organizes, reminds, and eventually acts on your behalf.

11. Product Goals

Short-Term Goals

- Validate demand
 - Build active user base
 - Achieve daily usage habits
-

Mid-Term Goals

- Become preferred reminder assistant
 - Introduce AI memory system
 - Improve retention
-

Long-Term Goals

- Become personal operating system
 - Autonomous life assistant
 - AI companion platform
-

12. Feature Categories

Communication

- Chat interface
 - Voice interface
 - AI conversations
-

Reminder Management

- One-time reminders
 - Recurring reminders
 - Smart reminders
 - Context reminders
-

Notification System

- Push notifications
 - Voice notifications
 - AI calls
 - Multi-device alerts
-

AI Understanding

- Natural language parsing
 - Intent recognition
 - Context understanding
 - Personalized learning
-

AI Memory

- User preferences
 - Personal facts
 - Relationship tracking
 - Important events
-

Scheduling

- Calendar integration
 - Time blocking
 - Conflict resolution
-

Personal Knowledge

- Memory vault
 - Searchable history
 - Event timeline
-

Autonomous Actions

Future:

- Booking appointments
- Sending messages

- Rescheduling tasks
 - Managing routines
-

13. Revenue Model

Freemium

Free Plan

- Limited reminders
- Basic AI parsing

Premium Plan

- Unlimited reminders
 - Voice assistant
 - AI memory
 - Smart scheduling
 - Advanced automation
-

Future Revenue Streams

- Team plans
 - Family plans
 - Enterprise assistants
 - API platform
 - AI life coaching
-

14. Success Metrics

Acquisition

- Landing page conversion
 - App installs
-

Activation

- First reminder created
-

Engagement

- Daily active users
 - Reminders created per user
-

Retention

- 7-day retention
 - 30-day retention
-

Revenue

- Premium conversion rate
 - Monthly recurring revenue
-

15. Product Principles

Every feature must satisfy at least one:

1. Reduce cognitive load
 2. Save time
 3. Reduce forgetting
 4. Increase reliability
 5. Feel magical
 6. Feel effortless
-

16. Long-Term Vision (10 Years)

Phase 1

AI Reminder Assistant

Phase 2

AI Memory Assistant

Phase 3

AI Productivity Assistant

Phase 4

AI Life Operating System

Phase 5

Autonomous Life Companion

Capabilities:

- Understand context
 - Remember history
 - Predict needs
 - Automate actions
 - Coordinate daily life
-

17. Product North Star

"Speak naturally. Let Speakardo handle the rest."
