

# Speakardo Product Roadmap & Milestones

Version: 1.0

Product: Speakardo

Timeline: 0 → 10 Years

Status: Strategic Roadmap

---

## Product Evolution Vision

Speakardo will evolve through multiple stages:

Stage 1: AI Reminder Assistant

Stage 2: AI Memory Assistant

Stage 3: AI Productivity Assistant

Stage 4: AI Personal Operating System

Stage 5: Autonomous Life Assistant

The goal is not to become another reminder app.

The goal is to become the primary AI layer between people and their daily lives.

---

# PHASE 0 — Validation (Before Serious Development)

Duration: 1–3 Weeks

Goal: Validate demand before building.

---

## Deliverables

Landing Page

Waitlist

Fake Door Test

Product Demo Video

Analytics Setup

Email Collection

---

## Success Criteria

100+ Waitlist Signups

10%+ Landing Page Conversion

Positive User Feedback

Users saying:

"I need this."

---

## Failure Criteria

Low interest

Low signup rates

Poor retention expectations

---

## PHASE 1 — MVP

Duration: 4–8 Weeks

Goal: Validate AI Reminder Experience

---

### Core Promise

User types:

"Remind me to call Ali tomorrow at 5"

Speakardo understands and schedules automatically.

---

### Features

Authentication

Email Login

Google Login

JWT Auth

---

Chat Interface

Text Chat

AI Responses

Confirmation Flow

---

Reminder System

Create

Update

Delete

Complete

Snooze

Recurring Reminders

---

AI Parsing

Rule Engine

Date Parsing

LLM Fallback

---

Notifications

Push Notifications

FCM Integration

Device Registration

---

Voice

Speech To Text

Basic Voice Input

---

Settings

Timezone

Language

Notifications

---

## Technical Goals

Flutter

FastAPI

PostgreSQL

Redis

Docker

FCM

---

## Success Metrics

500 Users

1,000+ Reminders Created

25% Weekly Retention

Users Creating Multiple Reminders

---

## PHASE 2 — Public Beta

Duration: 2–3 Months

Goal: Build Daily Habit Formation

---

## New Features

Improved Reminder UX

Smart Suggestions

Reminder Templates

Reminder Categories

Quick Actions

---

## **AI Improvements**

Better Parsing

Learning User Patterns

Confidence Scoring

Personalized Suggestions

---

## **Analytics**

Reminder Completion Rates

User Activity Tracking

Feature Usage

---

## **Success Metrics**

5,000 Users

50,000 Reminders

30% Monthly Retention

---

## **PHASE 3 — Voice Assistant**

Duration: 3–6 Months

Goal: Become Hands-Free Assistant

---

## **Features**

Voice Conversations

Wake Word

"Hey Speakardo"

Voice Commands

Voice Responses

---

## **AI Features**

Context Awareness

Follow-up Questions

Conversation Memory

---

## **Examples**

"Remind me to call mom."

"When?"

"Tomorrow."

"Done."

---

## **Success Metrics**

30% Users Using Voice

Daily Voice Sessions

Growing Engagement

---

## **PHASE 4 — Shared Reminders**

Duration: 3 Months

Goal: Enable Collaboration

---

## Features

Assign Reminders

Shared Reminders

Reminder Tracking

Reminder Acceptance

Reminder Completion Tracking

---

## Use Cases

Manager → Employee

Parent → Child

Couples

Families

Friends

---

## Example

"Remind Sarah to pay electricity bill tomorrow."

---

## Success Metrics

20% Users Sharing Reminders

Growth Through Invitations

---

# PHASE 5 — Team Workspaces

Duration: 4–6 Months

Goal: Expand Into Teams

---

## Features

Teams

Departments

Workspaces

Shared Schedules

Reminder Ownership

Analytics

---

## Roles

Owner

Admin

Member

Viewer

---

## Example

Marketing Team Workspace

Sales Team Workspace

Startup Workspace

---

## Revenue

Team Subscription Plans

---

# PHASE 6 — AI Memory System

Duration: 6 Months

Goal: Speakardo Remembers Important Things

---

## Features

Personal Facts

Relationships

Preferences

Important Dates

Personal Notes

Life Events

---

## Examples

"My mother's birthday is June 10."

"I prefer meetings after 10 AM."

"Remember that I moved to Lahore."

---

## Retrieval

"When is my mother's birthday?"

"What did I tell you about my dentist?"

---

## Result

Speakardo becomes more personal.

---

## PHASE 7 — Calendar Intelligence

Duration: 4–6 Months

Goal: Manage Time Automatically

---

### Integrations

Google Calendar

Apple Calendar

Outlook

---

### Features

Conflict Detection

Availability Analysis

Schedule Suggestions

Meeting Preparation

Time Blocking

---

### Example

"Find time next week for dentist."

---

### Result

Speakardo becomes scheduling assistant.

---

## PHASE 8 — AI Call Reminders

Duration: 3–6 Months

Goal: Highest Reminder Reliability

---

## Features

AI Voice Calls

Natural Voice

Multiple Languages

Call Retries

Escalation Rules

---

## Example

Phone rings

"Hello Nouman.

This is Speakardo.

It's time to take your medicine."

---

## Premium Feature

High-value subscription driver

---

# PHASE 9 — Smart Life Assistant

Duration: 6–12 Months

Goal: Predict User Needs

---

## Features

Predictive Reminders

Habit Learning

Routine Detection

Behavior Analysis

Context Awareness

---

## Examples

"You're usually heading to the gym now."

"You forgot to log your medicine today."

"Leave now to arrive on time."

---

## Result

Assistant becomes proactive.

---

# PHASE 10 — AI Action Engine

Duration: 1–2 Years

Goal: Move Beyond Reminders

---

## Capabilities

Send Messages

Book Appointments

Schedule Meetings

Order Services

Reschedule Tasks

Fill Forms

Manage Calendar

---

## **Example**

"Book dentist appointment next week."

Speakardo performs action.

---

## **PHASE 11 — Family Operating System**

Duration: 1–2 Years

Goal: Manage Entire Households

---

### **Features**

Family Accounts

Shared Calendars

Shared Tasks

Child Reminders

Household Coordination

Emergency Contacts

---

### **Revenue**

Family Subscription

---

## **PHASE 12 — Business Assistant**

Duration: 1–3 Years

Goal: Enterprise Expansion

---

## Features

Company Workspaces

Employee Assistants

Meeting Coordination

Workflow Reminders

Internal AI Assistant

---

## Revenue

Enterprise Plans

---

# PHASE 13 — Autonomous Life Assistant

Duration: 3–5 Years

Goal: Life Management Layer

---

## Capabilities

Long-Term Planning

Goal Tracking

Life Recommendations

Routine Management

Decision Assistance

Task Delegation

---

## Example

"I want to get fit."

Speakardo creates:

Workout Plan

Reminder Schedule

Progress Tracking

Motivation System

---

## PHASE 14 — Personal AI Operating System

Duration: 5–10 Years

Goal: Become User's Personal OS

---

## Capabilities

Persistent Memory

Personal Knowledge Graph

Cross-App Intelligence

Life Analytics

Autonomous Execution

AI Agents

---

## Example

Speakardo knows:

Who you are

What matters to you

Your goals

Your schedule

Your habits

Your relationships

And helps manage them.

---

## Revenue Evolution

Phase 1

Freemium

---

Phase 2

Premium Subscription

---

Phase 3

Family Plans

---

Phase 4

Team Plans

---

Phase 5

Enterprise Plans

---

Phase 6

AI Agent Marketplace

---

# Milestone Summary

M8 Calendar Intelligence

M9 AI Calls

M10 Smart Assistant

M11 Action Engine

M12 Family OS

M13 Business Assistant

M14 Personal AI Operating System

---

## Ultimate Vision

A future where users no longer manage reminders, calendars, tasks, schedules, or personal information manually.

They simply tell Speakardo what they want, and Speakardo handles the rest.
